- Other, respectively, [Enter other category here]

Location of the internship: Kerkrade, The Netherlands

Internship period: February - June 2018

Application deadline: January 14th 2018

Details

Cube design museum offers students, young designers and alumni the possibility to work in the Cube design labs. Students can join us within the framework of an internship, a minor or graduation project. You work within a multidisciplinary team, with students from different disciplines, faculties and nationalities, supported by experts from relevant disciplines and of end-users. Actively engaging museum visitors in your design process is part of your daily routine.

The teams apply principles of design thinking and co-creation. They find solutions for or new ways to deal with issues or challenges, together with visitors, scientists, stakeholders and end-users. The starting point will be "Design for human needs and ambitions". The teams will come up with new products, concepts or services on the basis of a request from society, industry, social organizations or specific interested parties.

Each team works on its own design project, the “Cube Call”. This call is to be completed within a period ranging from a number of weeks to some months. Next to going through the entire design process, students are responsible for making visitors feel welcome to join the labs and actively involving them in the design process through workshops, brainstormings, activities, and interactive exhibitions. Cube design museum will provide professional coaching on design thinking and visitor participation. The design processes and their final outcomes will remain visible for the museum visitors.

The company is offering

- working on meaningful design that has an impact on the world;
- working in a multidisciplinary (and international) team;
- professional coaching;
- help you developing creative, professional, and social skills;
- the design (process) will be included in the Cube design museum collection;
- access to rapid prototyping machines: laser cutters, 3D printers, etc.

We are looking for motivated doers who can think beyond given frames; who are open-minded and dare to take up challenges off the beaten path. We believe that creativity does not depend on disciplines. What you need is a designer’s mind-set, with:

Qualification / Skills

- team spirit;
- excellent communication skills in spoken and written Dutch and/or English;
- visual, verbal and textual skills to document and present the design process to visitors and stakeholders;
- motivation to actively involve museum visitors in your design process on a daily basis;
- an optimistic and responsible attitude;
- the availability to work on Weekend days and holidays. Location: Kerkrade.
